

**Opto Circuits' US subsidiary launches next-gen patient monitor at German show –
MEDICA 2009**
**Group's other companies also showcase leading non invasive products at the
Expo**

Düsseldorf, Germany | 20th November 2009

Opto Circuits (India) Limited and its subsidiaries – US-based Criticare Systems, Inc. (CSI) and Mediaid, Inc. are participating in The World Forum for Medicine, the MEDICA in Dusseldorf. The focus of this year's show is the global launch of CSI's new patient monitor eVision™, a modular design featuring a 15 inch high resolution touch screen display with an interactive user interface. CSI is also showcasing its entire range of gas benches, multi-parameter monitors and SpO2 sensors in an extravagant display where even a new "pod" style meeting room was incorporated into this year's booth design to hold private meetings with distributors and potential customers. CSI has sales and engineering personnel available at the booth.

Mediaid is also contributing to the Group's presence in the show by displaying its range of desktop and handheld monitors.

The World Forum for Medicine, the MEDICA in Dusseldorf, counts over 4300 Exhibitors from 60 nations, a record participation. Innovations from the medical sector and medical research are presented.
