

**Opto Circuits' subsidiary, Cardiac Science, rationalizes its product offering
by spinning off its Diagnostic Cardiology product line**

**BENGALURU, KARNATAKA, INDIA
April 1, 2013**

[Cardiac Science](#), an [Opto Circuits](#) group company, signed a definitive agreement on 29th March 2013 to sell its Diagnostic Cardiology product line to Mortara Instrument, Inc. for an estimated consideration of USD 21 Million. The transaction does not include MySense®, the novel, wearable, single-patient ECG recorder system and the Resuscitation business unit that markets automated external defibrillators (AEDs) worldwide.

“Divestiture of the Diagnostic Cardiology product line will bring more strategic focus to Cardiac Science. The company will now be able to exclusively focus on innovation and the expansion of market share in its high-margin and high growth Resuscitation Business,” said Neal Long, CEO, Cardiac Science.

“The addition of these businesses to our organization represents a marked opportunity to accelerate the introduction of Mortara’s leading ECG technology to new markets,” commented Dr. Justin Mortara, CEO.

About Mortara Instrument

Mortara Instrument, Inc. was founded 30 years ago and today is a recognized technology leader in the world of ECG. Mortara’s global headquarters is located in Milwaukee, Wisconsin with operations in Australia, Germany, Italy, the Netherlands, and the United Kingdom. Mortara is distinguished in the field of non-invasive cardiology for innovations that are the core of the company’s complete line of ECG products including electrocardiographs, stress exercise systems, Holter systems, data warehousing solutions, and cardiology monitoring systems. The company manufactures and distributes its ECG devices and related technologies worldwide. Mortara’s market leadership is a result of its substantial investment in R & D which has fueled the introduction of many new Mortara products uniquely positioned to benefit customers in their everyday use of diagnostic ECG devices.
