

Opto Circuits group company - Unetixs unveils next-gen MultiLab Vascular System at SVU Conference

Ergo IDC Vascular System among first in vascular industry to adhere to Infectious Disease Control practices

Bengaluru, India | Rhode Island, USA| June 3, 2013

Unetixs Vascular Inc., a group company of Opto Circuits (India) Ltd. (Bloomberg: OPTC IN; Reuters: OPTO. NS; NSE: OPTOCIRCUI; BSE: 532391) and a leader in non-invasive vascular technology, is excited to announce the release of the next-generation MultiLab® vascular system: The innovative **Series II LHS Ergo IDC**. This one-touch, fully functional vascular system incorporates a 19-inch touch-screen monitor on a multi-axis mount for ergonomically correct usage while sitting or standing. Moreover, the vascular system is among the first in the vascular industry to adhere to Infectious Disease Control (IDC) practices.

Unetixs, renowned for unsurpassed clinical accuracy and ease of use, unveiled the Ergo IDC vascular system on May 30th at the Society for Vascular Ultrasound Annual Conference 2013 in San Francisco, California.

“Unetixs is pleased to offer a vascular system that follows the IDC practices and provides ergonomically enhanced features. It will give health care professionals the confidence to not only make accurate diagnoses and significantly reduces the chances of infection.” said John Haefele, VP GM, Unetixs Vascular Inc.

“MultiLab systems continue to enjoy strong loyalty and significant brand equity from clinicians. This is why we believe that Ergo IDC vascular system will be met with strong demand in the U.S. market,” said Vinod Ramnani, Chairman and Managing Director, Opto Circuits (India) Ltd.

The Ergo IDC’s touch-screen and keyboard features moisture-proof designs for easy disinfection. Further, disposable hoses and blood-pressure cuffs are designed to be thrown away after use, making clean up both faster and easier while considerably reducing the potential for infection.

About Unetixs Vascular Inc.
